Highlights of ASCO 2008 is our annual review of the most important international clinical oncology meetings of the year, featuring updates in clinical and translational cancer research in primary disease sites, supportive care, and cancer prevention. The target audience is physicians, oncology nurses, and other oncology professionals. For eleven consecutive years, the Vermont Cancer Center has coordinated this review as a service to its members, staff, and their regional healthcare colleagues.

Join us for the invaluable opportunity to hear regional cancer specialists review the most important presentations from the ASCO meeting. Key data will be presented, interpreted, and analyzed. Ample time for discussion will be provided.

The keynote address will be given by Stephen B. Edge, M.D., Chair of Breast and Soft Tissue Surgery, Roswell Park Cancer Institute, Buffalo, NY, on the topic of National Programs for Improving the Quality of Cancer Care. Dr. Edge is a member of the Executive Committee of the Board of Directors of the National Comprehensive Cancer Network (NCCN).
